As a market maker or high frequency trader you are constantly looking for lower latency solutions in the pursuit of best execution for your clients. This seminar will provide insight into how NYSE Technologies and our partners are developing their solutions to give you an edge.

AGENDA:

Welcome

James Hyde, Vice President, NYSE Amex Options

NYSE U.S. Options Update

Erich Umar, Vice President, NYSE U.S. Options

Erich Umar will discuss the latest developments within NYSE U.S. Options to show how we're working to provide our participants with more opportunities.

Putting Compute On Demand to Work to Add to the Bottom Line

Phil Radin, Product Manager, NYSE Technologies

Scott Key, Director of Financial Services Industry Vertical, VMware

Phil Radin and our partners at VMware will explain how you can leverage the NYSE Technologies Capital Markets Community Platform to host your infrastructure and trading technology to reduce friction and get to market quickly.

Enabling Trader Success with Superfeed and Actant Extream

Chris Zanelli, Product Manager, NYSE Technologies

John Fickle, U.S. Sales, Actant

Dan Sacks, Head of ExStream Delivery, Actant

Chris Zanelli and our partners at Actant will demonstrate how synergies between Actant's ExStream, a programmable algorithmic trading application, and SuperFeed and Compute On Demand services can deliver outstanding levels of trading intelligence with extremely low latency.

Cocktail Reception and Technology Demonstrations from NYSE Technologies, VMware, MDX, and Actant.
